

Raise Funds without Risk or Investment

Even in a Struggling Economy

No sector has been hit harder by the economic crisis than nonprofit and charitable organizations. And as nonprofit consulting experts have advised, economic downturns are not the time to experiment with risky or radically new approaches to fundraising — particularly if they require an upfront investment of capital and staff training.

* **Help Your Corporate Donors Save Money While You Raise Money-- Automatically**

Telcom Insight offers a way for you to raise funds automatically through an ongoing annuity. This annuity results from the significant savings — often thousands of dollars — that your corporate donors receive on their voice and internet bills.

Simply refer your corporate donors to Telcom Insight and let us save them thousands on telecom services. In return, you can receive 2% of their voice and internet billing amounts on an ongoing basis as donations. This equates to an annual donation of \$10 to \$15 per office employee!

* **Your Sponsors Make a Call, Send a Fax and Pay No Fees Themselves**

Have your corporate donors call Program Director Doug McMillan at 888-483-4020 for more details on how Telcom Insight can negotiate significant savings with their carriers, and directly benefit your organization with no costs to them.

- * They will fax in the first five pages of current telecommunications billing.....
- * Telcom Insight will do a free analysis of the carrier billing and make a recommendation to your corporate donor.
- * There is no risk, no obligation, and nothing to lose. Often, Telcom Insight will be able to save your donor 20-30% off their monthly bill.
- * If your corporate donor decides to follow Telcom Insight's recommendations, Telcom Insight will ensure a smooth transition over to the new plan or carrier.
- * After transition is complete, the referring non-profit will receive 2% of the corporate donor's voice and internet billing amounts on an on-going basis as a donation. For example, a 20 employee business with typically generate a donation of \$250 each year!

"Telcom Insight created a residual, predictable monthly income for NFTE in 2010 that is growing. Our corporate donors enjoy the savings on their AT&T services while we earn a percentage of the billing. It's a true win-win!"

Estelle Reyes
Los Angeles Director
Network for Teaching
Entrepreneurship (NFTE)

"As a non-profit bank, PRFCU wanted to cut costs, gain better access from their carrier, and streamline their ordering process. Telcom Insight was able to cut costs by 27%, a contract savings of over \$29,000 that goes right to our bottom line."
